Credit Name: CSE3010 - Computer Science 3

Assignment Name: BreakAPlate

How has your program changed from planning to coding to now? Please explain.

I reused a lot of the code from the class demo especially with getting and using the images. I had to look into the textbook to see how to generate random numbers since it had been a while since I've coded that.

```
mages\\placeholder.gif");
ges\\plates_all_broken.gif");
ges\\plates_two_broken.gif");
\\plates.gif");
\\sticker.gif");
\\tiger_plush.gif");
```

All images were provided as a gif when the class demo used png. This was unexpected but I didn't have to change any code.
